

# Installing The Free **Join.Me** Application

## Step 1

Using your Internet browser, Go to:

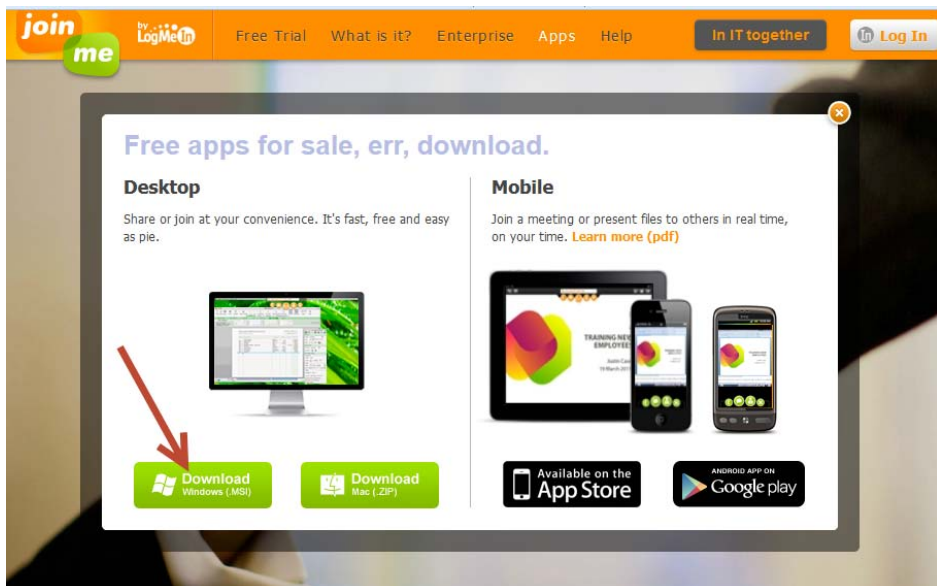

<https://join.me>

You will see this screen. Click on the Apps item (on the orange menu bar) because you want to download the software.

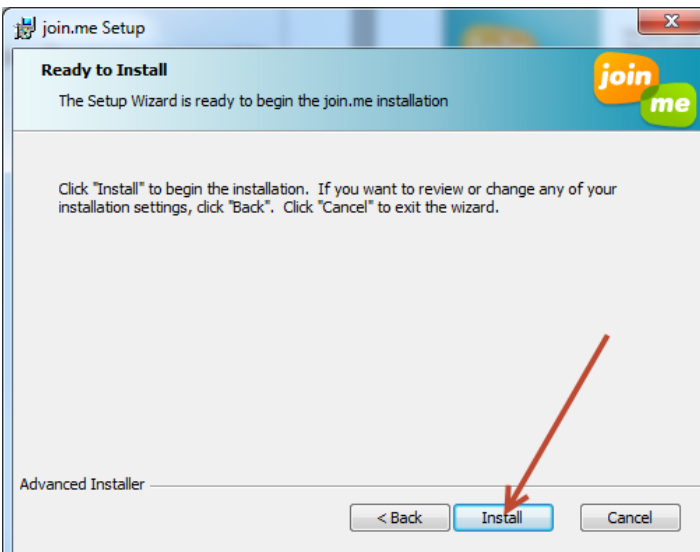

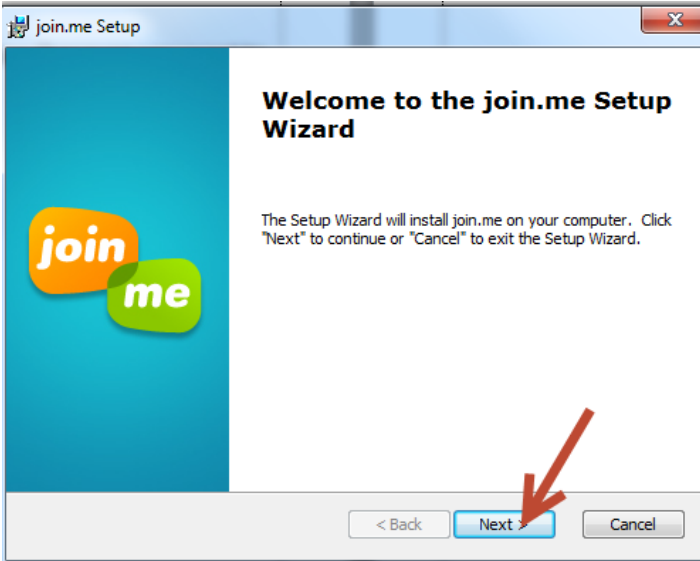

## Step 2

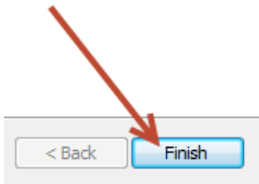

In the next screen, if you have a Windows computer, click on the green Download button for Windows.

Click through the next screens until the software is successfully installed.

When it is done installing, click on the Finish button:

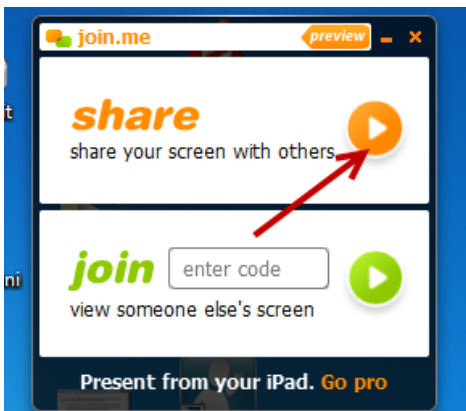

### Step 3

When you are done, you will have an icon on your desktop for the program. To bring it up, double-click on it:

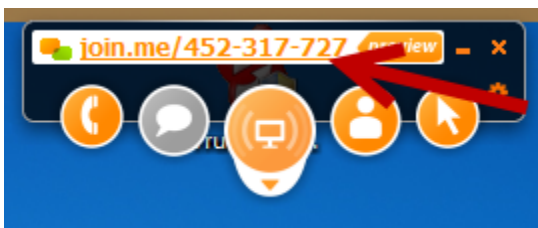

### Step 4

When the program comes up, it will display this at the top of your screen. To share your screen with another person (who is using the *join.me* program, click on the orange “share” circle.

It will generate three sets of numbers that are separated by a dash. Tell these numbers to the other person and they will be able to join your screen. They may ask you for permission to use your mouse.

When either of you want to quit the session, it is ended by clicking on the X in the top right of this little window.
