

iPhone features to try

1. Immediately establish a free account with iTunes at:

<http://www.apple.com/itunes/>

Benefits:

- It is free.
- You get all your free and purchased applications “apps” for you iPhone here.
- When you register your iPhone, whenever you plug it into the USB wire, it will automatically bring up iTunes software on that computer, log you in, and sync the contents of your phone. This means that all the apps you bought and installed on the phone are backed up, ready to reinstall on your next phone.

Using Mozilla Firefox (the IE browser version will be available shortly) **create a MobileMe account at:**

<http://mobileme.com>

(it will immediately take you to a secure site for logging in or setting up your account.)

Benefits:

- They give you a free trial period of at least a couple of months.
- It will back up your phone, give you an email account.
- If you forget where you put your phone (or someone walks off it with), click on the Find My iPhone.

Find My iPhone and Remote Wipe

Find psiddons's iPhone

psiddons's iPhone
iPhone 3GS
Online

Map shows device's estimated location as of 10:59 AM, December 9, 2009.

Display a Message or Play a Sound

Write a message that will appear on your iPhone's screen. You can also play a sound on your iPhone, even if it is in silent mode.

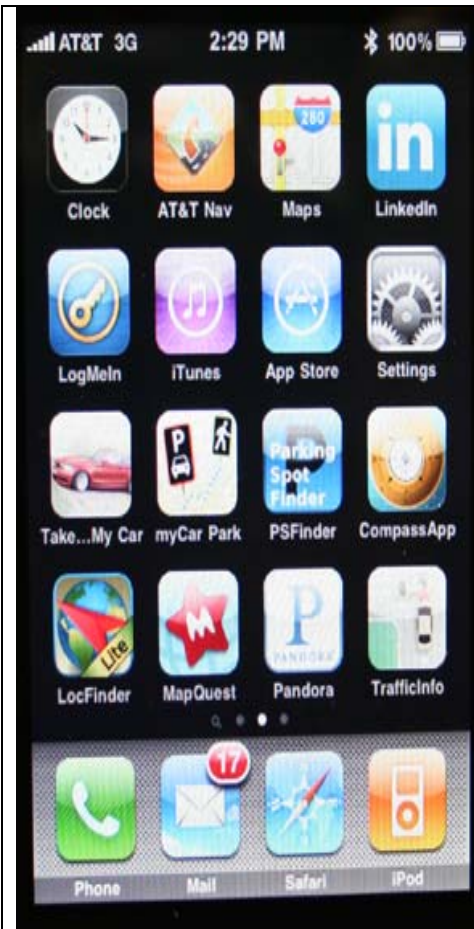

Remote Passcode Lock

Lock your iPhone using a four-digit passcode.

Remote Wipe

This will permanently delete all media and data on your iPhone, restoring it to factory settings. This will not suspend your wireless service. Once wiped, your iPhone will no longer be able to display messages or be located. [Learn more.](#)

With Mobileme, you can see **where the phone** is located (if you turned on the feature on the phone), **display a message on your phone** for the person who has it, **remotely create a lock code** for the phone, **remotely lock the phone** with your pass code and **remotely erase all the contents of your phone** with “Remote Wipe” when you believe your phone is in the hands of someone who could try to get your information from the phone.

AT&T Nav (Navigator. \$10/month, gives you GPS maps and verbal instructions on how to get to your destination.

LinkedIn – enables you to communicate with your friends in LinkedIn social networking site.

LogMeIn – If you have set up remote control of numerous computers with a LogMeIn account, this \$29 app lets you control the other computers from your iPhone screen.

iTunes – this free app lets you get free and purchased apps for your iPhone (but you can get them from your PC and the new apps will automatically sync when the iPhone is plugged in through the USB cable).

Take My Car, myCar Park (and other **parking apps** show you where you parked your car. Free or \$1.

Pandora – Plays internet radio stations after finding out what kind of music you like.

To-Do's – A handy \$1 app that lets you make lists of things to do.

Calendar – Syncs with Exchange Server's Outlook calendar.

Contacts – Syncs with Exchange Server's Outlook contacts.

Messages – for sending text messages to anyone in your contacts list (if you are hooked up with an Exchange server, it uses those contacts)

Notes – for writing (you can email them too) notes. (This does not sync with your Outlook notes)

Camera – With an iPhone 3Gs, you have not only a decent 3 megapixel **camera** but a good **video camcorder** as well.

Voice Memos, SE2 Lite, Recorder, others – Some free, some for \$1, for **recording voice messages**; good for taking notes

Facebook – Free. Lets you check on your social networking friends from your phone.

Kindle – Free. It is really called **iKindle**. Lets you read books on your iPhone. You buy them or get them free from Amazon.
